Negotiating Group on Market Access

SELECTIVE BIBLIOGRAPHY OF RESEARCH ON MARKET ACCESS

Note by the Secretariat

The Chairperson of the Negotiating Group on Market Access requested the Development and Economic Research Division to compile a bibliography of research on market access. The bibliography is a contribution towards meeting the requirement for 'appropriate studies' as stated in paragraph 16 of the Fourth WTO Ministerial Declaration.

The attached bibliography¹ is not comprehensive and will be further developed over the course of negotiations. It is illustrative of the type of research that has been undertaken on the various topics within the mandate of the Negotiating Group on Market Access. It should be noted that it is part of a broader effort of the Development and Economic Research Division to develop bibliographies related to various aspects of the work program in the Fourth WTO Ministerial Declaration.

In preparing the bibliography within the specified time and resource constraint, a number of decisions were taken. These were:

- including primarily studies after 1995;
- including primarily applied studies related to market access issues in industrial products;
- the taxonomy of studies broadly reflects the issues in paragraph 16;
- allocating papers to the various categories based on their primary emphasis.

The references were standardized according to year, author, title, publisher and place of publication. If a reference was available through the internet the relevant link as of 28 March 2002 is provided.

¹ Original language only.
