Negotiating Group on Market Access

WTO MEMBERS' TARIFF PROFILES

Note by the Secretariat¹

The profiles of Members' tariffs were compiled at the request of the delegation of Malaysia. They are based on data available in the WTO Consolidated Tariff Schedules database (CTS) and the Integrated Data Base (IDB).

1. Tariff profiles for MFN final bound duties were taken from the CTS. Two Members (Moldova and Poland) out of the total WTO Membership are not covered because their files could not be prepared in time for the tariff profile analysis. Therefore tariff profiles for bound duties are shown for 126 Members.²
2. Tariff profiles for MFN statutory applied duties are taken from the IDB. They cover the 77 Members and Acceding countries for which processed information is available.¹ In each case the latest available year has been selected.
3. To improve cross-country comparability the profiles have been compiled at the Harmonised System (HS) 6-digit level taking into account tariff lines in chapters 01 to 97. The HS 6-digit level product classification offers a common standard structure which is not biased by the different levels of disaggregation in Members' tariffs. For the calculation of HS 6-digit duty averages and maxima, only *ad valorem* duties, including *ad valorem* equivalents (AVEs) if supplied by the Member, were used. However, the incidence of non *ad valorem* duties (specific, mixed, or compound duties) is indicated in all tables.
4. The first step in the calculations consisted of aggregating both bound and applied tariff line data up to the 6-digit level. With respect to bound duties, only bound tariff lines were taken into account in the calculations. No assumptions were made as to the duty of unbound tariff lines. Therefore, any 6-digit subheading was considered to be bound if at least one tariff line within that subheading was bound, and the duty averages were calculated only on bound tariff lines. Any 6-digit subheading where no tariff line within that subheading was bound was considered to be unbound. Unbound subheadings were not included in the calculations.
5. All subsequent steps in the calculations were based on these 'pre-aggregated' HS 6-digit duty averages.
6. The results are presented in ten tables, which can be divided into four different sets. In each set information for all products and non-agricultural products is presented separately.

¹ This document has been prepared under the Secretariat's own responsibility and without prejudice to the positions of Members and to their rights and obligations under the WTO.

² The Member states of the European Union are counted as one, and Switzerland and Liechtenstein are also counted as one.

- Tables 1-3 are summary statistics of Members' MFN final bound duties;
 - Tables 4-6 are summary statistics of Members' MFN statutory applied duties;
 - Tables 7 and 8 cover individual Members' MFN final bound duties;
 - Tables 9 and 10 cover individual Members' MFN statutory applied duties.
7. To describe in more detail the calculation methods used, a full description of the column headings in the Tables covering MFN final bound and MFN statutory applied duties is given below.

MFN final bound duties - description of column headings for Tables 1-3 and 7-8

Column heading		Description or method of calculation
Import market		WTO Member.
Binding coverage (percent)		Number of HS subheadings containing at least one bound tariff line divided by the respective total number of HS subheadings of the corresponding version of the HS nomenclature (all products - HS92: 5020, HS96: 5113; non-agricultural products, as defined by the WTO Agreement on Agriculture – HS92: 4357, HS96: 4436).
Simple average		Simple average of the <i>ad valorem</i> final bound HS 6-digit duties.
Standard deviation		Standard deviation of the final bound HS 6-digit duties.
Maximum		Maximum <i>ad valorem</i> final bound duty based on tariff line duties.
Last year of implementation		Latest final year of implementation.
Duty free (percent)		Number of HS subheadings for which all tariff line duties are equal to zero, divided by the respective total number of HS subheadings.
Dutiable (percent):	Total	Number of HS subheadings for which not all tariff line duties are equal to zero, divided by the respective total number of HS subheadings.
	Of which <i>non ad valorem</i>	Number of HS subheadings having at least one non <i>ad valorem</i> duty without <i>ad valorem</i> equivalent, divided by the respective total number of HS subheadings. Duties not provided were treated as non <i>ad valorem</i> .
International peaks (percent)		Number of HS 6-digit duties higher than 15 per cent, divided by the respective total number of HS subheadings.
National peaks (percent)		Number of HS 6-digit duties at least three times higher than the Member's overall simple average, divided by the respective total number of HS subheadings.
Other Duties and Charges (ODCs):	Simple average	Simple average of the ODCs with <i>ad valorem</i> HS 6-digit duties.
	Maximum	Maximum <i>ad valorem</i> ODC duty based on tariff line duties.
	Of which <i>non ad valorem</i> (percent)	Number of HS subheadings having at least one non <i>ad valorem</i> ODC duty, divided by the respective total number of HS subheadings.

MFN statutory applied duties - description of column headings for Tables 4-6 and 9-10

Column heading		Description or method of calculation
Import market		WTO Member or Acceding country.
Year		Year of the tariff.
Total number of tariff lines		Total number of tariff lines in the Members' tariff schedule, including suffixes.
Simple average		Simple average of the <i>ad valorem</i> MFN applied HS 6-digit duties, taking into account AVEs if submitted for the IDB.
Standard deviation		Standard deviation of the MFN applied HS 6-digit duties.
Maximum		Maximum <i>ad valorem</i> MFN applied duty based on tariff line duties, taking into account AVEs if submitted for the IDB.
Duty free (percent)		Number of HS subheadings for which all tariff line duties are equal to zero, divided by the respective total number of HS subheadings.
Dutiable (percent):	Total	Number of HS subheadings for which not all tariff line duties are equal to zero, divided by the respective total number of HS subheadings.
	Of which non <i>ad valorem</i>	Number of HS subheadings having at least one non <i>ad valorem</i> duty without <i>ad valorem</i> equivalent, divided by the respective total number of HS subheadings. Duties not provided were treated as non <i>ad valorem</i> .
International peaks (percent)		Number of HS 6-digit duties higher than 15 per cent, divided by the respective total number of HS subheadings.
National peaks (percent)		Number of HS 6-digit duties at least three times higher than the Member's overall simple average, divided by the respective total number of HS subheadings.
